○ ○ ○ ○

[1-5] Read the passage and answer the questions.

In this newly emerging economic order, workers sometimes organized to protect their rights and traditional ways of life. Craftworkers such as carpenters, printers, and tailors formed unions, and individual unions came together in the National Trades' Union in 1834. The labor movement ①gathered some momentum in the decade before the Panic of 1837, but in the depression that followed, labor's strength collapsed. During hard times, few workers were willing to strike or engage in collective action. And skilled craftworkers, who ② spearheaded the union movement, did not feel a particularly strong bond with semiskilled factory workers and unskilled laborers. More than a decade of ③agitation did finally bring a workday shortened to 10 hours to most industries by the 1850's, and the courts also recognized workers' right to strike, but these gains had ④_____ immediate impact.

1. Which of the following statements about the labor movement of the 1800's is inferred?

- ① It was most successful during times of economic crisis.
- ② Its primary purpose was to benefit unskilled laborers.
- ③ It was slow to improve conditions for workers.
- ④ It helped workers of all skill levels form a strong bond with each other.

2. Which is the closest in meaning to the underlined ① 'gathered some momentum'?

- ① became active ② caused changes ③ combined forces ④ made progress

3. Which is the closest in meaning to ②'spearheaded'?

- ① accepted ② changed ③ led ④ resisted

4. Which is the closest in meaning to ③'agitation'?

- ① expertise ② disturbance ③ prosperity ④ tolerance

5. Which of the following best fills in the blank ④_____?

- ① a few ② a little ③ a lot of ④ little

[6-10] Choose group of words that best completes the sentence.

6. My daughter _____ the chicken pox on her third birthday.

- ① got around ② got through ③ came down with ④ came up with

7. My new calculator is so complicated that I can't _____ how to use it.

- ① bring up ② brush up on ③ catch on ④ figure out

8. If a new movie catches on, _____

- ① very few people go to see it. ② a lot of people go to see it. ③ it's easy to understand. ④ it ends quickly.

9. She spends all her money on her children and manages to _____ new clothes for herself.

- ① come across ② die down ③ go without ④ mix up

10. The sign "+" in an arithmetic problem _____ "addition."

- ① makes up ② lets down ③ thinks out ④ stands for

2015학년도 재외국민과 외국인 특별전형 영어필기고사 문제지

[11-14] Read the passage and answer the questions.

David Smith worked primarily in iron, exploring its possibilities more fully than any other sculptor before or since. To Smith, iron spoke of the power, mobility, and vigor of the industrial age. Smith was born in Indiana in 1906, the descendant of a nineteenth-century blacksmith. His iron sculptures flowed naturally out of the mechanized heart of America, a landscape of railroads and factories. As a child, Smith played on trains and around factories, as well as in nature on hills and near creeks. He originally wanted to be a painter, but after seeing photographs of the metal sculpture of Picasso in an art magazine, he began to realize that iron could be handled as directly as paint.

Many of Smith's sculptures are "totems" that suggest variations on the human figure. They are not large iron dolls, although ①several have "heads" or "legs." Still, they forcefully convey posture and gesture. Their message flows from the internal relations of the forms and from the impression of tension, spring, and alertness set up by their position in space.

Later in his career, Smith produced two series of sculptures in stainless steel: the *Sentinels* in the 1950s and the *Cubis* in the 1960s. He also began placing his sculptures outdoors in natural light, where the highly reflective stainless steel could bring sunlight and color into the work. In the late afternoon sun, the steel planes of the *Cubis* reflect a golden color; at other times, they have a blue cast. The mirror-like steel creates an illusion of depth, which responds better to sunshine than it would to the static lighting of a museum.

11. Which of the following can be inferred about David Smith's background?

- ① He gained experience while working in a blacksmith factory.
- ② His childhood exposed him to the uses and possibilities of iron.
- ③ His early sculptures revealed his desire to be a landscape painter.
- ④ He first learned about metals by seeing pictures in a magazine.

12. What does the word ①several refer to?

- ① dolls ② forms ③ sculptures ④ variations

13. What can be inferred about the *Sentinels* and the *Cubis*?

- ① They are the best-known examples of Smith's "totem" sculptures.
- ② Smith originally intended to use iron instead of stainless steel.
- ③ The *Sentinels* are made of blue steel, and the *Cubis* are of gold steel.
- ④ They each consist of a number of pieces placed in outdoor settings.

14. Which of the following can be inferred about David Smith's works?

- ① His metal sculptures are more interesting than are those of Picasso.
- ② His sculptures attempt to portray the proportions of the human body.
- ③ His pieces capture the power of industry and the beauty of natural light.
- ④ His works are best appreciated when viewed all at once in a museum.

[15-18] Choose the suitable expression to complete the text below.

An exchange of smiles, in a shop or between a parent and child seems to be a simple act. 15) _____, with those individuals, a smile can have powerful physical and emotional effects 16) _____ a reduction in stress-related cardiovascular response. 17) _____, smiling creates a sense of trust and social wellbeing which spreads outward to others. Smiling may not solve the world's problems, but it is the foundation of something that will outlast them, 18) _____, the cooperative basis of human society.

- ① furthermore ② however ③ such as ④ that is to say
